CAPITAL IMPROVEMENT BUDGET

The Capital Improvement Program (CIP) is a five-year budget for capital expenditures, as defined below. Each capital project, along with its estimated cost, is described and the combined financial requirements are summarized on the following pages.

The five-year Capital Improvement Program is approved in total, although only projects in the first year are included in the Capital Improvement Budget. Projects in the approved Capital Improvement Budget are subject to subsequent appropriation by the Board of Commissioners.

A Capital Improvement Project is defined to encompass those steps required to design and construct or purchase a self-contained capital asset. A capital improvement includes only those items constructed or purchased which involve a cost of not less than one hundred thousand (\$100,000) dollars or involve the acquisition of land regardless of cost. Each project must have a useful life of not less than ten (10) years following their acquisition. However, computer hardware and software projects with a combined cost of not less than \$100,000 and having an estimated life of 5 to 10 years may be acquired with bonds to be retired in 7 years or less. All costs which represent items that are physically a part of a building qualify if the construction or renovation project exceeds a cost of \$100,000. Otherwise, each component of a project must have a cost in excess of \$20,000 and the project must exceed \$100,000. Recurring annual expenditures for maintenance or repairs of existing capital improvements are excluded from this type of funding. Planned asset acquisitions, which do not meet this definition, are requested as a part of the operating budget.

On the individual projects listed herein, the amounts reflected for "prior year" are only for the project being approved. Any past projects that have been completed, will no longer have their associated costs listed as "prior year."

FUNDING OF CIP BUDGET

Year one of the CIP Budget establishes the specific projects and the maximum amount of contracts that may be awarded and approved for the fiscal year. Projects may be completed and contractors paid within the fiscal year or construction may continue into one or more future years.

Funding for the county's portion of the CIP Budget is generally obtained through a short term borrowing program or, the issuance of long term general obligation debt. A short term borrowing program may be established each fiscal year to cover the estimated amount of current year payments for projects authorized in that year as well as the payments expected from projects appropriated in previous fiscal years and continuing into the current year. When short term borrowing is used, it is converted to long term general obligation debt within approximately two years after the initial sale.

If a short term borrowing program is utilized, then in addition to establishing the borrowing program size, the County Commission must approve and adopt an initial authorizing bond resolution that provides the funding for the current fiscal year's capital plan. The amount to be authorized in this resolution is based on the assumption that all allocations in the current fiscal year's plan will be appropriated. Any unused prior year authorization may carry forward and be netted against the current year's requirement.

In fiscal 2006 and 2007, the County provided \$13.9 million and \$11.7 million, respectively, from the General Fund to CIP for pay-as-you-go rather than debt issuance. Pay-as-you-go funds will generally be used for projects that do not constitute assets of Shelby County, for smaller projects, projects that have a shorter useful life, and other non-school projects. All fiscal 2009 non-school projects are expected to be paid from pay-as-you-go funds. The County intends to develop an ongoing pay-as-you-go program to the extent funding can be identified.

PROJECT DESCRIPTION

Location: From Jack Bond Road to Salem Road
Creates a through connection of Brunswick Road by the elimination of two 90 degree turns on Jack Bond Road. This will increase the safety and capacity of Brunswick Road. The project is about 0.6 mile in length.
The FY 2011 funds are for design and the FY 2012 funds are for right-of-way acquisition and construction.

PROJECT DESCRIPTION

Construct a four lane roadway from Highway 51 to Woodstock Boulevard including a bridge over the CNIC Railroad. This 1.2 mile project will connect to the section of Fite Road from Woodstock Boulevard to Raleigh-Millington Road which was completed 7 years ago and provide a signalized intersection at Highway 51. The local funding represents 20% of total cost of the project. The remaining 80% is provided by TDOT (Tennessee Department of Transportation) from scarce local Surface Transportation Program (STP) funds under the highly competitive local Transportation Improvement Plan (TIP).

The project provides a badly needed regional east-west connection with security and emergency response implications important to residents in the Woodstock-Cuba area among others. The bridge, while improving access for the area, also removes the safety concern of train/automobile/truck crashes, particularly those involving chemical laden trucks and trains. The project will also relieve congestion during NASCAR events and thus have an impact on air quality.

Funding in 2006 was for preliminary engineering (PE) which includes National Environmental Protection Act (NEPA) requirements and completion of the design. Funding in 2009 will be for acquisition of right-of-way (ROW) and construction (CONST).

PROJECT DESCRIPTION
Location: Countywide
Cost share (75:25) with U.S. Army Corps of Engineers to study and develop a plan for preservation and protection of regional water supply aquifers. This is expected to be a \$10,000,000 project over 5 years. It is subject to obtaining Federal funding.
Local governments cost share of 25% will be shared with participating sponsors. University of Memphis Groundwater Institute and the U. S. Geological Survey (USGS) will provide primary technical support.
This project is to be phased:
1. Data collection and reconciliation of existing data.
2. Development and utilization of state-of-the-art technology to accurately define the regional hydrogeology.
3. Development of computer models to address groundwater overuse and contamination.
4. Development of "Best Management Practices" at watershed scale.

PROJECT DESCRIPTION

The Health Division is a joint agency with the City of Memphis. The City of Memphis will reimburse the County for 50% of these projects. The County has previously appropriated \$670,000 for the medical management system. Therefore, our share is reduced by this amount.

1. Asbestos removal at 814 Jefferson	150,000	150,000	150,000	150,000	150,000	150,000	750,000
2. Replace 3 boilers	200,000						200,000
3. Medical Management System	830,000	500,000	150,000	150,000	150,000	150,000	1,780,000
4. Forensic Center Equipment	-	2,000,000					2,000,000
Total	1,180,000	650,000	2,300,000	300,000	300,000	300,000	4,730,000

1. Remove asbestos from the first floor of 814 Jefferson.
2. Replace 3 boilers at 814 Jefferson that are over 30 years old and have significant maintenance problems.
3. Obtaining and implementing an integrated system to maintain, share and track personal health records for inmates and others.

This project will also require additional operating costs.

PROJECT DESCRIPTION

1. HVAC Controls Retrofit/VAV in CJC
 2. Waterproofing
 3. Boiler Replacement @ 201 Poplar
- TOTAL**
1. HVAC controls retrofit/VAV - this project includes repairs and upgrades to the primary for the Criminal Justice Center air handling units for the Criminal Justice Center. The repairs and upgrades include replacing existing pneumatic controls with DDC controls, connecting and integrating the new controls into the current automation system, replacing control valves, cleaning all coils and removing all deactivated components. This is a five year project to be completed in FY 2012.
2. Waterproof exterior of building to stop water leaks.
3. Periodic replacement of boilers as they reach the end of their useful life.

PROJECT DESCRIPTION

In FY2009, replace roof on the 1930's and 1960's sections of the facility (\$400,000) and split one courtroom into two courtrooms (\$200,000).

In FY2011, replace windows in the old section of the facility which will eliminate leaks and improve energy efficiency.

PROJECT DESCRIPTION

1. Fan Coil System @ 160 N. Main
2. ADA Upgrades in various buildings
3. ADA Sidewalk Accessibility
4. Parking Lot Lighting @1075 Mullins Station
5. Waterproof Exterior of Archives Building

TOTAL	-	1,100,000	1,000,000	2,250,000	1,500,000	1,000,000	6,850,000
-------	---	-----------	-----------	-----------	-----------	-----------	-----------

1. Replace all water piping associated with the HVAC system throughout the building
2. Upgrade existing SCG facilities to achieve compliance with current building codes with respect to provisions of the ADA. This is a multi-year project. The SCG building inventory will be surveyed to determine extent of need, and implementation will be prioritized according to greatest need.
3. Upgrade existing sidewalks to meet ADA requirements.
4. The original health care function of the building ceased in 2001. The building has subsequently been converted to an administrative function. The employee occupancy has increased from approximately 200 employees to near 500 employees. The daily customer load has also increased to over 500 customers per day. Consequently, the parking lot has to be increased to meet customer traffic. Also, insufficient drainage surrounding the building allows flooding conditions during heavy rains.
5. Waterproof exterior of building to improve energy efficiency and make repairs on the building.

Items 1, 7 and 8 are replacing and/or upgrading equipment as they reach the end of their useful life and providing increased capacity as uses increase. Items 2 and 3 are upgrades to our mainframe computers to extend their useful life. Item 4 is to replace the financial systems which include personnel, payroll, purchasing and general ledger and financial reporting. The current systems were implemented in 1998. Items 5 and 6 prepare for and then replace the three core criminal justice systems used by law enforcement, the jail, the corrections center and the courts.

Funding for school constructions and improvement allocated between the County Schools and the Memphis Schools based on average d attendance (ADA) . The funding agreement dated August 15, 2005 commits funding of \$60,000,000 for FY 2009.

TBD - Funding for school capital needs will be determined by the Shelby County Board of Commissioners in the future based upon the recommendations of the Needs Assessment Committee.
